ABOUT

I am a motivated and detail-oriented IT graduate eager to kick-start my career as a Python developer. Throughout my academic journey, I have cultivated a strong foundation in programming principles and gained hands-on experience in various aspects of IT. I am excited to apply my skills and knowledge to real-world projects in the dynamic field of software development.

WORK EXPERIENCE

Python Developer - Internee

01/04/2023 - 30/09/2023

Karachi IT Lands

- I have developed various Python-based projects during my academic studies, actively contributing to open-source communities and engaging in continuous self-learning to deepen my understanding of advanced Python concepts, including web development, data science, and machine learning. My problem-solving skills have been honed through troubleshooting and debugging, efficiently resolving issues in Python code.

PERSONAL PROJECT

GS-SHOP

Developed and managed a Django-based e-commerce platform with user authentication, Google login integration, and password reset functionality. Implemented features like product catalog management, cart functionality, and social media logins, optimizing the user experience.

DESI FOOD

Developed a "Desi Food" website featuring cart management, product listings, and customer order processing. Implemented functionality for adding, removing, and updating cart items, and created forms for customer contact and order placement
